

# MANUFACTURING INFOGRAPHIC: SD-WAN BY THE NUMBERS

FOCUS ON YOUR PRODUCTION INSTEAD OF YOUR NETWORK

1

## DIGITAL TRANSFORMATION

**66%** of manufacturers are changing their business model by 2021 to take greater strategic advantage of IT.

2

## INTERNET OF THINGS

**86%** of manufacturers report they already have either implemented IoT, or they are in the process of implementing IoT solutions.

3

## REAL-TIME MONITORING

**81%** of manufacturers say real-time monitoring improves their business.

4

## REDUCE FACTORY DOWNTIME

**69%** reduction in annual site downtime has been reported by enterprises who have already deployed SD-WAN.

5

## IT STAFF PRODUCTIVITY GAINS

**3X** increase in IT staff productivity is calculated for small organizations who transform their network from legacy routers to SD-WAN.

6

## NETWORK COST SAVINGS

**50%** reduction in network cost is achievable by replacing MPLS bandwidth with SD-WAN using broadband connectivity.

7

## 100% CLOUD-BASED

**33%** of manufacturing CIOs are being pressed by executive management to become 100% cloud-based, surpassing all other industries in the 2018 Forbes survey.

8

## CLOUD-BASED MANUFACTURING

**\$19.7 billion** in spending in 2018 ranks the discrete manufacturing industry as the top single industry consumer of public cloud services.
